Relevant users are
signed up to
CloudVue

Tender materials
are gathered

Internal email notifications
allow users to be updated
as the tender progresses

Complete system audit
allows administrators to
be in control

Pre-made templates
are optimised for
procurement management

Users are assigned roles,
groups and permissions

Procurement template
applied in the repository
and relevant information
is added

Draft documents
and materials are
managed from
within the system

Tender application is
streamlined for
submission

Version control for all
file types provides
security and confidence
moving forward

Procurement Management
